True or false?

Fact-checking in pediatric endocrinology

How many questions from parents can pediatricians answer each day? Many questions arise every day as a result of seeing children in clinical practice. In the era of evidence-based medicine, are all our answers correct and updated?

Starting from some of the most frequent answers we can give to questions regarding the pediatric endocrinology field, we will find out whether they are true or false through an EBM fact-checking, in order to improve our daily practice.

The congress is dedicated to pediatricians (residents in pediatrics, primary care and hospital pediatricians), endocrinologists and nurses.

8.30 Opening

Introduction

Chair: Andrea Taddio (Trieste, Italy), Elena Faleschini (Trieste, Italy)

8.40 Pediatric Endocrinology in Alpe Adria

Gianluca Tornese (Trieste, Italy)
